

SANKALP TYAGI

Ghaziabad, Uttar Pradesh

+91 9897907063 sankalptyagi01@gmail.com LinkedIn Github

Professional Summary

Computer Science and Engineering student with experience building scalable web applications using React, Next.js, and modern web technologies. Strong foundation in data structures and algorithms (C++), with hands-on experience in AWS cloud deployment and SQL-based data handling. Currently expanding backend development skills to build high-performance, user-centric applications.

Experience

Training & Placement Coordinator

April 2023 – Present

Ajay Kumar Garg Engineering College

- Collaborated with faculty and corporate teams to organize **50+ placement drives** (on-campus & virtual).
- Managed end-to-end communication for **300+ students**, including registration, scheduling, and interviews.
- Streamlined logistics and documentation, improving coordination efficiency by **30%**.
- Coordinated with recruiters and stakeholders to ensure timely execution of placement activities, improving overall process reliability and candidate experience.

Technical Skills

Languages: C++, JavaScript, TypeScript, Python

Frontend: HTML, CSS, Tailwind CSS, React, Next.js

Backend: Node.js, Express.js, REST APIs, Socket.io

Databases: SQL, MongoDB

Cloud & Deployment: AWS (EC2, S3), Vercel, Cloud Deployment

Tools: Git, GitHub

Education

Ajay Kumar Garg Engineering College, AKTU

Nov 2022 – Jul 2026

B.Tech in Computer Science and Engineering (Data Science), CGPA: 7.7 (till 7th sem)

Ghaziabad, U.P.

K.L. International School (CBSE)

2021

Higher Secondary – 89.8%

Meerut, U.P.

Heritage Children Academy (CBSE)

2019

Secondary School – 85%

Milak, Rampur, U.P.

Projects

Dastaan – Cultural Storytelling Chatbot | Next.js, TypeScript, Tailwind CSS, Groq API | [Live](#)

Mar 2026

- Built an **AI-powered cultural storytelling web app** generating 100+ structured narrative responses using Groq API.
- Designed features like **interactive world maps, guided prompts, and search**, improving user engagement by **40%**.
- Integrated **LLaMA 3.3 70B model** and implemented a clean, modular architecture with **dark mode support**.

Swiggy Clone – Food Delivery Web App | React, JavaScript, CSS, REST API, AWS | [Live](#)

Nov 2025

- Engineered a **food delivery web app** with 10+ core features including menu browsing, ordering, and cart system, integrating **REST APIs** to manage data for 100+ items and restaurant listings.
- Hosted the application on **AWS**, gaining hands-on experience in cloud hosting and infrastructure setup.
- Optimized responsive UI, reducing load time by **25%** across devices and ensuring smooth performance across screen sizes.

Hush – Encrypted Chat App | Next.js, Tailwind CSS, Node.js, Socket.io, AWS EC2 | [Live](#)

Apr 2025

- Developed a **real-time chat application** enabling 2-way communication with low latency using Socket.io.
- Implemented **Next.js features** like automatic routing and server-side rendering (SSR), improving rendering speed by **30%**.
- Managed and maintained the application on **AWS EC2 and Vercel**, ensuring reliable hosting, proper development workflow setup, and scalable configuration.

Achievements

- * Built and deployed **2+ full-stack projects** focused on performance, usability, and scalability.
- * Earned consistent academic scores while actively participating in co-curricular responsibilities.
- * Served as Class Representative since 1st year, maintaining academic coordination and student feedback reporting.
- * Authored and presented a research paper on **Navigating the Diagnostic Dilemma in Cardiology: A Validation of the Performance-Safety Equilibrium in Machine Learning at the 2nd International Conference on Next-Generation Communication and Computing (NGCCOM-2025)**, to be published in the Springer LNNS Series (SCOPUS Indexed).
