## SUMMARY

Final-year B.Tech student in CSE(AIML) with hands-on experience in **full-stack web development**. Proficient in **JavaScript, HTML, CSS, React.js, Next.js, Node.js, and Express.js**. Familiar with programming languages like **C++** and **Python**. Experienced with **MongoDB** and **MySQL** databases. Strong analytical and **problem-solving abilities** with a focus on building **scalable** and **user-centric** applications.

## EDUCATION

### Ajay Kumar Garg Engineering College

Bachelors of Technology in CSE(AIML)

Nov 2022 - 2026

**CGPA: 7.15/10**

### ST Michael's School

Senior Secondary (Class XII)

Apr 2020 - Mar 2021

**Percentage: 75.80**

## EXPERIENCE

### Intern | NIIT Foundation

- Performed hands-on network simulation using Cisco Packet Tracer, configuring routers, switches and basic routing protocols.
- Analyzed packet flow and network traffic to understand device communication, addressing schemes, and common network vulnerabilities.
- Practiced fundamental cybersecurity concepts including threat detection, access control, password policies, and secure.

## PROJECTS

### Taskify — Full Stack Task Management System

- Developed a full-stack task management platform featuring authentication, email verification, role-based access control, and secure JWT + HTTP-only cookie sessions.
- Built complete task CRUD functionality with priority filters, status tracking, due-date monitoring, and interactive visual dashboards using Recharts.
- Designed a modern, fully responsive UI using Next.js App Router, Tailwind CSS, Radix UI components, and Framer Motion for smooth page transitions and micro-interactions.

### Secure Data Transfer Channel Using Fully Homomorphic Encryption (FHE)

- Built a secure communication channel leveraging Fully Homomorphic Encryption (FHE) to enable encrypted data processing without decryption.
- Implemented FHE-based encryption workflows to ensure confidentiality, integrity, and privacy-preserving computation during data transfer.
- Evaluated performance trade-offs, encryption overhead, and security guarantees compared to traditional cryptographic methods.

## TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React, Tailwind CSS, Shadcn/ui
- **Backend:** Node.js, Express.js, REST APIs, Mongoose
- **Database:** MongoDB, MySQL, Firebase (Realtime DB and Firestore), AWS
- **Technologies/Frameworks:** Next.js, React Bootstrap
- **Languages:** C, C++, Python, JavaScript, SQL

## CERTIFICATIONS

- **Intro to Cybersecurity** | Infosys Springboard
- **Cybersecurity Essentials** | CISCO Network Academy

## ACHIEVEMENTS

### GATE — Qualified (Quality) 2025

- Qualified GATE 2025 .
- Leveraged theoretical knowledge to propose practical process-improvement approaches in coursework and projects.

## RELEVANT COURSEWORK

- Database Management System
- Operating Systems
- Computer Architecture
- Software Engineering
- Computer Networks

## VOLUNTEER EXPERIENCE

### — Slum Swaraj Foundation(NGO)

01/2023 – Present

*Educator (Head of Human Resource Team)*

Educated over **100+** underprivileged students, supporting learning and career growth. Managed sports activities for **100+** students to promote physical and mental fitness. Facilitated personal and academic development, leading to improved student performance . Executed a fundraising campaign that raised over **100k** to provide educational materials.
